Operational Cost Breakdown

! KEY FINDINGS

Only 3 of 30 customers carry ALL leakage risk. Charlie Medical and Delta Manufacturing face double risk - both margin pressure and operational exceptions.

Bravo FMCG risk is purely contractual - 422,913 activities generating only 17.28% margin.

96% of all exceptions are "Possible Unrecovered Activities" - all from Charlie Medical (C003). Indicates systematic billing/activity tracking failure requiring urgent review.

Exception Types - M1 vs M2 Breakdown

Exception Type	Month 1	Month 2	Total
Possible Unrecovered Activity	35991		35991
Returns	351	378	729
Rework	202	209	411
Urgent Order	178	187	365
Total	36722	774	37496

Key Findings from Data

- Only 3 of 30 customers carry all \$417,935 of at-risk revenue — concentrated risk requiring immediate management intervention.
- 96% of all exceptions (35,991 of 37,496) are unrecovered activities from Charlie Medical only — systematic billing failure, not operational.
- Bravo FMCG drives highest activity volume (422K units) returning only 17.28% margin — classic Scale Without Return pattern requiring contract renegotiation.
- Rework + Returns labour = 9,241 hours of non-value-adding activity — operational efficiency opportunity worth ~\$200K annually.
- Echo Imports at 84.57% margin is the portfolio star. Growth investment should run parallel to risk remediation.
